

**Sustainability Awareness Program:** Greenhouse Gases Measurement | GHG Protocol Scope 1,2,3,4

## **Sustainability : Awareness Program**

GreenIO is committed toward climate pledge that moves the needle on carbon emission and drive corporates in their mission toward NET ZERO. As part of this commitment, GreenIO is also providing a series of environmental sustainability capacity-building resources to help companies start their sustainability journeys.

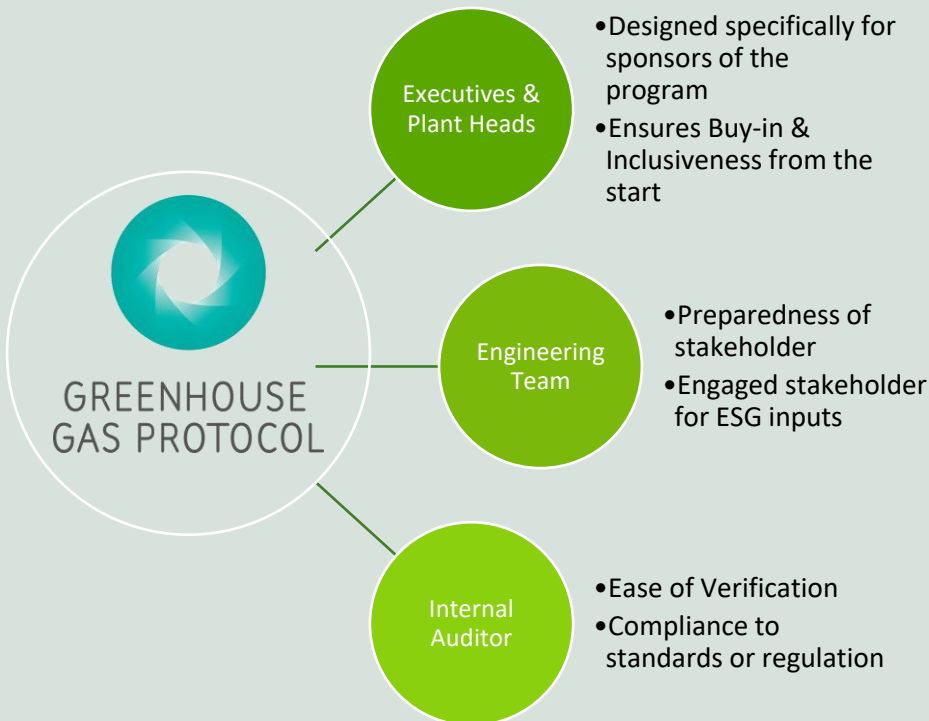

GreenIO is partnering with the T-Hub (Technology-Hub), which will work with designated suppliers and corporates in building awareness programs, identify technical solutions reducing GHG emissions and provide implementation assistance to help them make investments in more efficient and low-carbon operations.

GreenIO Awareness Program is specifically designed to help corporates, both sponsors and stakeholder, increase awareness on Sustainable Development Goals - Climate Action programs undertaken within the organization in abating CO<sub>2</sub> Emissions.

**Sustainability Awareness Program:** Greenhouse Gases Measurement | GHG Protocol Scope 1,2,3,4

**Sustainability : Awareness Program**

- Typical Program Guidelines**
- Causes and impacts of climate change
  - Policy background for climate change
  - Drivers for GHG reporting
  - The concepts of carbon neutrality, GHG inventories and footprinting
  - Different types of GHG standards
  - Boundaries in GHG reporting
  - Types of GHGs
  - Different methods for calculating emissions
